PROFESSIONAL SUMMARY

I am a full-stack developer and IT professional with a strong foundation in computer science and hands-on experience in software development. My expertise includes C#, React TypeScript, PostgreSQL, Azure, and Figma. I am passionate about solving complex problems, designing intuitive user interfaces, and building scalable applications. I thrive in collaborative environments and continuously seek opportunities to improve my skills and contribute to innovative projects.

I currently work for a tech startup in the United Kingdom, where I contribute to the development of an innovative application, leveraging my full-stack expertise to build a scalable and efficient solution. Additionally, I am expanding my expertise in DevOps engineering, gaining experience in Linux system administration, cloud computing, automation, and networking.

Additionally, I am the organiser of Flutter Birmingham, a community dedicated to fostering learning and collaboration in mobile app development using Flutter.

PROFESSIONAL EXPERIENCE

AUTOADVISE

Full-Stack Developer   January 2025 - Present

Responsibilities include but are not limited to:

- Collaborating with the development team to build and deploy AutoAdvise, an AI-powered platform that enhances financial advisory services.
- Developing and maintaining frontend components using React TypeScript to create a seamless user experience.
- Implementing backend logic with C# to support core platform functionalities.
- Designing and managing databases using PostgreSQL, ensuring data integrity and efficiency.
- Working with Azure for cloud deployment and infrastructure management.
- Designing UI/UX components using Figma to improve application aesthetics and usability.
- Implementing Clean Architecture principles to ensure scalable, maintainable, and testable code.
- Actively participating in Agile development processes, including sprint planning and code reviews.

FRANNBERRY SCHOOL

Information Technology Support Specialist   March 2022 - December 2025

Responsibilities included but were not limited to:

- Conducting precise data entry and maintain comprehensive records.
- Providing general admin support, including typing, photocopying, and electronic filing.
- Offering IT support as needed, resolving IT-related tickets for staff.
- Utilising Google Sheets to create and manage spreadsheets, including data analysis, financial tracking and inventory management.
- Capturing meeting minutes and coordinate responses across project teams and stakeholders.
- Tracking deliveries, monitor purchase orders, and invoices for smooth logistics and financial tracking.
- Supporting onboarding activities and maintain training schedules for new starters.
- Procuring office supplies and equipment to sustain operations.

TEK EXPERTS

Microsoft 365 Technical Support Engineer   March 2021-March 2022

Responsibilities included but were not limited to:

- Provided technical support to Microsoft 365 customers in North America (NOAM) and Europe, Middle East, and Africa (EMEA) regions.
- Coordinated with cross-functional teams to ensure delivery of technical support services.
- Maintained comprehensive documentation of support requests, including technical work performed and research conducted.
- Provided written updates to Technical Lead and Team Manager on complex client tickets, liaising with team members for resolution.
- Managed and maintained AD domain controllers, including health monitoring, replication, and backup/restore operations.

PRIME ATLANTIC CEGELEC

Mechanical Maintenance Technician Trainee   July 2019 - February 2021

Responsibilities included but were not limited to:

- Participated in health and safety exercises to periodically identify and assess health hazards and risks within the work environment.
- Collaborated with cross-functional teams to analyse incident data, utilising root cause analysis findings to develop proactive safety measures and mitigation strategies.
- Fostered collaborative efforts with instructors and colleagues to augment comprehension and practical application of workshop methodologies and engineering fundamentals.
- Successfully completed a comprehensive curriculum encompassing eight mandatory units, covering foundational topics such as basic health and safety protocols, maintenance techniques, utilisation of hand tools, proficiency with measuring instruments, effective engineering communications, numeracy skills, fundamental principles of physical science, and electrical concepts.

FRANNBERRY SCHOOL

Information Technology Support Specialist   July 2017 - July 2019

Responsibilities included but were not limited to:

- Maintained precise records of software, ensuring regulatory compliance.
- Conducted software training sessions to empower staff in effective technology usage.
- Spearheaded cost reduction initiatives by strategizing and pricing solar panel installations to minimise operational expenses.
- Designed and maintained the school website for optimal functionality and aesthetics.
- Provided remote support to staff for the effective utilisation of Google Workspace for Education applications.
- Offered researched estimates on digital advertising for Facebook Ads and Instagram Ads.

TECHNICAL SKILLS

Programming Languages: C#, Python, JavaScript, React TypeScript and SQL
Databases: PostgreSQL, MongoDB, MySQL
Cloud & DevOps: AWS, Azure, Linux system administration, automation scripting (Bash, Python), networking fundamentals (DNS, DHCP, TCP/IP, routing, switching, HTTP)
Architecture & Design: Clean Architecture, Microservices
Frameworks & Tools: React, RESTful APIs, Git, Jira, Slack
Design: Figma, Adobe Photoshop and Adobe Illustrator
Business Intelligence: Power BI, Tableau, Microsoft Excel

EDUCATION

Birmingham City University
Master of Science in Computer Science

University of Benin
Bachelor of Engineering in Computer Engineering

CERTIFICATIONS

Oracle - Oracle Cloud Infrastructure Certified Architect Associate
Amazon Web Services - Amazon Web Services Certified Solutions Architect Associate
Amazon Web Services - Amazon Web Services Certified Cloud Practitioner
Oracle - Orace Cloud Infrastructure Certified Architect Associate
Microsoft - Azure Data Fundamentals

PROJECTS AND ACHIEVEMENTS

- Organiser of Flutter Birmingham, fostering learning and collaboration in mobile app development.
- Developed a Python script for Coca-Cola Stock Analysis using technical indicators and machine learning models.
